## CHANGES IN THE A. & M. FACULTY

Whither the Outs Go and Whence the Ins  
Came. What the Professors  
are Doing.

College Station, Texas, July 17.—

While applications are coming in from prospective students, who expect to enter the Agricultural and Mechanical college in September next, the vacancy committee of the board of directors has been busy with many applications for positions, and it is believed that those who have been selected will materially strengthen the faculty and will add much to the efficiency of the teaching force of the institution. Some of those who leave here by reason of better opportunities for work are strong men, and they will be sadly missed in the school. Prof. T. P. Junkin of the department of mathematics is a well known educator. He leaves the college in September to take a position as president of Daniel Baker college, Brownwood, T. J. Wertenbaker, who has been in the department of history and economics, has resigned to accept a position in the same department in the University of Virginia.

Prof. R. J. Potts, who was graduated from the college in 1907 in the department of civil engineering, and who has since then been an instructor in the department of mathematics, has been elected assistant professor of civil engineering, and will assume that position September 1. He is now at the University of Wisconsin taking a summer course. James Newton Michie of the University of Virginia has been elected instructor in mathematics. He is a graduate of the University of Virginia, where he has been teaching.

R. H. Leavell has been elected associate professor of economics. He succeeds Mr. Wertenbaker. Mr. Leavell was raised in Houston. He got his bachelor of arts degree in Harvard in 1901. In 1900 he won the Bowdoin prize at Harvard, which is the chief distinction of that university. He has been of the teaching force of the University of Mississippi several years which position he recently resigned. He is a grandson of Senator George of Mississippi. He is now at the Chicago University studying for additional degrees.

Dr. F. C. Bolton of the Agricultural and Mechanical college of Mississippi has been elected associate professor of physics, in charge of the department. This department has heretofore been combined with the department

of electrical engineering, but the board recently separated the two. Dr. Bolton will be at the head of that department. He is a graduate of the Agricultural and Mechanical college of Mississippi and has taken work at Cornell, at the University of Chicago and at the University of Wisconsin.

Charles LeRoy Wignall of Port Arthur has been elected instructor in freehand and mechanical drawing. Mr. Wignall was graduated this year from the department of architectural engineering. Prof. F. E. Giesecke of that department considers him one of the brightest young men who ever attended the school, and selected him for the work here because of his exceptional qualifications.

To fill the vacancy caused by the resignation of Gates Thomas, who goes to the Southwest Texas normal as the head of the English department, George G. Embrey has been elected instructor in English. Mr. Embrey is a graduate of the University of Texas, after which he took a post graduate course at the University of Chicago. He has had a thorough training for teaching, and taught at the Agricultural and Mechanical for four years in the English department, resigning his position he went to the University of Texas, where he was of the teaching staff in the English department.

Prof. C. F. Chastain of the department of history is taking a summer course at the University of Chicago.

Prof. J. A. Harrington of the department of mechanical engineering is taking a summer course at Cornell.

John W. Mitchell of the department of mathematics is taking a summer course at the University of Tennessee.

Dr. George S. Frapps, State Chemist, is in Colorado, but will return for the Farmers' congress.

Prof. J. B. Bagley of the textile engineering department is in Galveston studying cotton conditions.

Dr. Joseph R. Lay, college surgeon, will leave in a few days for New York to take a course of lectures.

Dr. Isaac Alexander, college chaplain, is at Henderson, his home.

Prof. E. J. Fernier, head of the department of mechanical engineering, is spending the summer at Garad Rapids, Mich.

Capt. Andrew Moses, professor of military science, is at Bursat.

### GRAYSON COUNTY GETS RAIN.

Long Drought in That Section Broken  
By Good Fall.

Special to the Eagle.

Denison, Texas, July 17.—After the most disastrous drought in many years and unprecedented heat, a fine rain fell in this section yesterday morning.

Special to the Eagle.

Sherman, Texas, July 17.—A splendid rain fell over Grayson county yesterday morning breaking the long drought. It comes in time to make corn crops.

### THE WEATHER.

New Orleans, La., July 17.—Tonight and Sunday generally fair.—Cline.

### NOTICE FOR BIDS.

Sealed bids will be received at the office of the city secretary of the City of Bryan up to noon, Monday, July 19, 1909, for the erection of the new fire station. Plans and specifications can be seen at the office of the City Secretary. Each bid must be accompanied by a certified check for \$100. The right is reserved to reject any and all bids.

Eugene Edge,  
J. E. Covey,  
Fire Committee.

### CITY SANITARY NOTICE.

All parties in the city of Bryan who know of their own knowledge of places that are not in a sanitary condition, are authorized to notify the Mayor or City Health Officer in writing and same will have prompt attention.

J. T. Maloney, Mayor.  
W. H. Oliver, M. D., City Health Officer.

## BIG HIPPO FELLED BY TERRIBLE TEDDY

A Three Ton Monster Goes Down Before His Unerring Aim.

Special to the Eagle.

Nalvasha, Africa, July 17.—Theodore Roosevelt, who is at present hunting in the south shore of Lake Nalvasha, succeeded yesterday in bringing down a big hippopotamus. The animal, it is estimated, weighed three tons.

## COTTON GOES DOWN A GLIMMERING

Reported Rains in Texas and Other Causes Given for the Sharp Decline.

Special to the Eagle.

New York, July 17.—Cotton opened weak yesterday morning at a decline of 15 to 20 points on rain in Texas. About noon Hunter's report, showing damage by boll weevil to be much less than generally expected, caused general selling, and big blocks were thrown on the market, causing a decline of about 45 points from yesterday's close. The big bulls supported the market early in the day, but the avalanche of selling orders was too strong and buying orders were withdrawn, allowing the market to decline. This is a reaction of a hundred points from the highest reached on the advance, and unless the bull crowd has liquidated part of their cotton, their position is considerably weakened.

### MALLY-TABOR.

Wedding of a Popular Bryan Young Lady and Prominent State Official Solemnized.

On Thursday evening at nine o'clock, at the home of the bride's brother, Dr. George R. Tabor in this city, occurred the marriage of Mr. Fred W. Mally and Miss Mattie Tabor, Dr. M. E. Weaver, pastor of the First Baptist church officiating.

In the quiet home wedding with only members of the immediate family and a few intimate friends present, the pretty ceremony lost nothing of that sweet sacredness, which hovers like a benediction around the marriage altar.

A courtship of more than twelve years, was thus happily culminated, and the happiness of loving hearts realized.

The bride has always lived in Bryan and although for the past few years she has traveled widely, visiting in all the principal cities of the East and North, and also in Texas, she chose her childhood home in dear old Bryan, to be the place she would seal her marriage vows. Here in the home town, where her father and mother were so beloved, and her brothers grew to manhood; here among the friends who are tried and true, here where every heart is sincere with interested love for her, it was a fitting and beautiful climax.

The bride wore a becoming princess robe of white trimmed with rich laces and wore no jewels.

The groom is well known in Bryan, being well remembered by many friends who met him during his residence at the A. & M. College, as State Entomologist.

He is a gentleman of culture and is a noble contributor to the literature of agricultural science in this State. Mr. Mally has been engaged in government work for some time, and is now of the official staff of Judge Ed R. Kome, State commissioner of agriculture.

Mr. and Mrs. Mally have gone to Beaumont for a short visit, before going to Austin where they will reside at the Morris Mansion. Later they will go for an extended visit to the groom's parents at Des Moines, Iowa.

See our window display and have explained to you the Rochester percolator; it makes the most delicious coffee and you will be satisfied that it will do the work of one that costs several times its price. Haswell's Book Store. (w 30 d 193)

## TREASURY DEPARTMENT. OFFICE OF COMPTROLLER OF THE CURRENCY.

Washington, June 25th, 1909.

WHEREAS, by satisfactory evidence presented to the undersigned, it has been made to appear that

"THE CITY NATIONAL BANK OF BRYAN," in the City of Bryan, in the County of Brazos and State of Texas, has complied with all the provisions of the "Act of Congress to enable National Banking Associations to extend their corporate existence and for other purposes," approved July 12th, 1882.

NOW THEREFORE, I, Lawrence O. Murray, Comptroller of the Currency, do hereby certify that "The City National Bank of Bryan" in the City of Bryan, in the County of Brazos and State of Texas, is authorized to have succession for the period specified in its amended articles of association, namely until close of business on June 25th, 1929.

IN TESTIMONY whereof witness my hand and Seal of office this Twenty-fifth day of June, 1909.

LAWRENCE O. MURRAY,  
Comptroller of the Currency.

[L. S.]

No. 4070

## FIRST STEPS TAKEN TO BUILD COLLEGE TROLLEY

Contract Signed with Engineer to Run Survey  
and Work will Begin Monday.

It is with great pleasure the Eagle is enabled to announce to its readers that the first real step in the construction of the Bryan-College trolley, or rapid transit line, have been taken.

One by one the details have been working out for the past few months. This little preliminary and that little detail have been disposed of, and in the meantime the work of raising the ten thousand dollar bonus has gone steadily forward, and now it is all but completed. The amount lacking is so small there is no doubt but that it can be raised any time in a few hours when it really becomes necessary.

The promoters are so sure the bonus can be completed, they are going ahead with the preliminary work of actual construction. A contract was signed today between the promoters and Engineer Tom L. Fountain of Houston, providing for the running of the preliminary surveys, and an estimate of the cost of construction along each of the lines so run. The work

of making the surveys will begin Monday morning and be pushed to completion as early as possible.

As soon as the lines are run and the estimate of cost of construction completed, the promoters will immediately take the next step in the work of building the line, which the Eagle is not at liberty to make public at this time. We can state however that there is little doubt but that the work will go steadily forward from this time on until the final completion of the line.

This is certainly glorious news and the Eagle knows it will be hailed with pleasure by the people of Bryan. The trolley line is our main hope and there is no question but that it will do more for Bryan than any other one enterprise that could possibly be secured.

With the trolley, Bryan's future is absolutely safe and the Eagle hopes the most liberal policy will be pursued toward the company in the way of franchises, right-of-way, etc.

### CLOSING REVIVAL.

Rev. W. J. Meads of Kurten, was in the city today and informed the reporter that he and Rev. F. C. Nash of Calvert, were now closing a highly successful revival at Thompson creek. The meeting has been in progress during the past week with much interest manifested and three additions to the church. The christian spirit in the community was also greatly revived. The same ministers will start a revival tomorrow at Old Tryon Baptist church.

When you go on your summer vacation have the Daily Eagle follow you and keep up with the news.
